WORK EXPERIENCE

Compass Group (POS-IT)

January 2025 - Present

- Develop automated sales and revenue reports using SQL and data visualization tools to track cost center performance and support data-driven decision making for business growth initiatives.
- Design and maintain Power BI dashboards for real-time inventory tracking and operational metrics across retail locations, enabling stakeholders to monitor KPIs and identify optimization opportunities.
- Manage end-to-end IT infrastructure including POS systems, digital kiosks, and enterprise software platforms while troubleshooting on-site technical issues to ensure 99%+ uptime for business-critical operations.
- Collaborate with marketing and finance teams to extract, transform, and analyze data from multiple sources (ServiceNow, POS systems, inventory databases) for event planning, promotional campaigns, and financial reporting.
- Support staffing operations through data analysis of scheduling patterns and call-out trends, providing insights that improve workforce planning and operational efficiency.
- Lead cross-functional event coordination and technical setup for company initiatives, managing both marketing execution and backend system integrations.

Morfeed, Front End Development Intern

February 2023 - May 2023

- Developed and optimized responsive user interfaces across various devices while working closely with cross-functional teams to integrate front-end components and implement UI/UX enhancements.
- Conducted code reviews, debugging, and performance optimizations that significantly improved platform efficiency and load times, enhancing overall user satisfaction.

Rely Service, Mobile Application Development

March 2021 - July 2021

- Developed a versatile full-stack application for listing houses, rentals, and services with dynamic search and booking features, creating an intuitive user interface that enhanced overall user experience.
- Gained hands-on experience in UI/UX design, database management, and server-side scripting while strengthening technical and problem-solving skills throughout the development process.

SKILLS

Languages	Python, C++, Git, TypeScript, JavaScript, DSA, DBMS, JSX, SQL, PHP, Excel
Frontend	TypeScript, React, HTML, CSS
Database Technologies	SQL, Relational Databases, MongoDB, PostgreSQL, Snowflake, Data Warehousing, ETL/ELT Processes, FastAPI, RestAPI, FireBase
Data & Analytics	dbt (Data Build Tool), Power BI, Dimensional Modeling, Star Schema Design, ELT Pipelines, Data Quality Testing, Query Optimization, Performance Tuning
Tools and Platform	Visual Studio, IntelliJ, Linux, Bash, Supabase, API Integration, LLM Integration, Open Source Projects
Cloud	Supabase, AWS, API Key Management
CI/CD Version Control	Git, GitHub, GitLab, Docker
Development Methodologies	Version Control Workflow, Unit and Integration Testing, API First Design, Agile Iteration

EDUCATION

Dec 2024	BS in Computer Science at California State University Monterey Bay	(GPA: 3.7/4.0)
Aug 2023	B.Tech in Computer Engineering at Vidyalankar Institute for International Education	(GPA: 10/10)
May 2022	Diploma in Computer Science at Thakur Polytechnic	(GPA: 10/10)

PROJECTS

Sales Analytics Dashboard — Internal Project

Jan 2025 - Present

Built interactive Power BI dashboard tracking revenue growth across multiple cost centers, integrating data from POS systems and financial databases to provide real-time visibility into sales performance. Designed SQL queries to extract and transform operational data, creating standardized reporting templates that reduced manual reporting time by 60% for finance and marketing teams.

AI Chatbot

[Website](#) — May 2025 - Current

Multi-Tenant AI chatbot backend architected with FastAPI and Supabase, providing isolated and secure conversational environments for multiple clients. Gemini API integration coupled with advanced memory management to enable natural, persistent dialogue by recalling previous user interactions.

AskOnce

[Website](#) — Jan 2025 - Apr 2025

AI-powered Website that leverages the Gemini API to search the live web, delivering up-to-the-minute, accurate answers to user queries. Privacy-first design featuring a strict zero data retention policy, ensuring no user conversations are ever stored or analyzed to guarantee confidentiality.

Tag Explorer

[Website](#) — August 2024 - December 2024

Full-stack web application that solves the limitations of hierarchical folders by introducing a flexible, tag-based system for organizing files across multiple categories. Integrated solution built with Node.js and MySQL, featuring distinct components for database management, tag editing, and responsive file searching.

PawsConnect

[Website](#) — Feb 2024 - May 2024

Responsive social networking platform built with React.js, featuring advanced search and visualization tools to enhance user connections and network exploration. Secure and inclusive user experience ensured through robust authentication mechanisms, including social media login options and integrated multilingual support.
